

## Data Collection Sheet

***\*Use a new sheet for every different location/site***

**Grower/Farm Name:** \_\_\_\_\_

**Vineyard location (GPS coordinate and/or address of grape location):** \_\_\_\_\_

**Cultivar, Block, Age:** \_\_\_\_\_

**1. Bud survival (%):** Date collected \_\_\_\_\_

% primary bud survival \_\_\_\_\_

**2. Loss of production:** 2022 yield per acre \_\_\_\_\_

2023 yield per acre \_\_\_\_\_

**3. Work hours spent above and beyond normal on a per block or cultivar basis to perform recovery tasks.**

Examples of Tasks Completed in 2023 Season	Hours to Complete Task
a. Additional pruning beyond normal practices	
b. Training of suckers for renewal	
c. Renewal sucker management practices	
d. Crop load adjustment to balance fruit load for partial crop 2023	
e. Dead vine removal if intending to replant vines in the same block	
f. Dead vine removal along with post and wire removal if entire block needs to be replanted	
g. Weed control efforts beyond normal practices	
h. Additional costs for pest control to protect sucker growth for vine re-establishment	

**4. Describe reallocation or existing labour to tasks not usually done in the vineyard under normal production practices when crop would be present and/or hiring of additional workers to assist in vineyard recovery/renewal/replanting.**

---

---

---

---

**5. Dead vine removal only as needed from planting if intending to replant vines in the same block.**

Number of dead vines \_\_\_\_\_

Date of observation/determination \_\_\_\_\_

Percentage of total vines in the block needing to be replaced \_\_\_\_\_

**6. Were your pruning practices different this year? Y/N**

What are your normal pruning practices?

---

---

---

If different than normal, what pruning practice did you employ? e.g., spur pruning, leaving extra canes, leaving canes longer than normal, pruned as usual, other please explain.

---

---

---

---

---

**7. Describe other tasks not listed above.**

---

---

---

---

---
